

## End of Life Notification

December 3<sup>rd</sup>, 2019

Dear and valued customer,

For over 30 years Teknek has been at the forefront of innovation in contact cleaning and as the pioneer of this technology, we strive every day to add value to your business so you can excel at manufacturing by removing contamination to maximize yields. In order to achieve this goal, we put decades of knowledge as well as our continuous advancements at your disposal year after year.

Nowadays, markets change and industries evolve faster than ever. For that reason, we launched early this year our new static-dissipative roller, NT™. On the other hand, while new products are launched others reach the end of their useful life, this is the case for some of our older items used for the maintenance of our cleaning rollers.

By means of this notification we would like to inform you that the products listed below will stop being sold at the end of June 2020.

Description	Part number
Roller Doctor Wipes – 100 Sheets (Tub)	MI63966
Roller Doctor Wipes – 100 Sheets (Refill)	MI63967

In recognition of the difficulties that this may cause to some customers we offer various alternatives that can be used as replacement for the products that will be discontinued. This will allow you to keep maintaining your elastomer rollers in top condition and maximise cleaning performance and production yields. Further information about these options can be found in the Abbreviated Maintenance Plan provided along with this notification.

Please do not hesitate to contact our customer services representatives for further information and assistance on this matter or visit our website at [www.teknek.com](http://www.teknek.com)

Thank you for your continued support and preference throughout the years.

Oliver Bustamante  
Product Manager

## Abbreviated Maintenance Plan

Frequency	Recommendation	Product(s)	Image
Daily	Clean the rollers using Tekwipes® sterile wipes	Tekwipes – 100 sheets (tub) Mi6700C
